

102 Pleasant-View

Wilmore, Ky.

Sept. 10, 1957

Dear Folks,

Excuse the pencil but I can't seem to find a pen. I am defrosting the refrigerator and while it is dripping I'll try to get this letter off to you.

Jake is in Wisconsin holding services. His school doesn't start until the 18th. Paul and John are in school now. It's sort of good to be back into the routine again.

Mark is supposed to get the cast off his leg day after tomorrow. He is getting all excited about that.

We had a little rain here last night; The [sic] first in two months. Everything is so dry. The leaves are falling from the trees already.

Has Phyllis started in at Coe yet? Has Fran found out any more about her trip? We are hoping that she can stop off a few days here.

We still have four of our pups. They are sure cute but we can't keep the fleas off them.

How are the horse-shoe champs

doing? We played quite a bit before  
Jake left for this trip.

We received a long letter from Jake's  
sister. She is in Seminary now and  
seems to be having a wonderful  
time.

Tell Margaret thanks for the birth-  
day gifts. I haven't let the kids  
open them yet.

Friday Evening- I didn't get this letter  
finished so will try again.

It's been raining steady now for  
two days. It all comes at once!

Mark didn't get his cast off. The  
Dr. said that he was too active and  
might rebreak [sic] it so it will be in  
the cast for two more weeks.

I've started my house-cleaning but  
so far have just done the toy box  
and children's book-case [sic]. We want  
to clean the garage tomorrow.

Twinkle, our baby kitten got run  
over the other night. I sure miss her.

Have you drawn names for Christ-  
mas yet. If Margaret + Fran would  
rather not do it that way it's alright

with me. We are still planning to go  
to Oregon but don't know about the  
date yet. We hate to take the kids

-Page Break-

out of school early. Any-  
how we'll probably see you  
for a day or so then.

It's bed-time [sic] so will close  
for now.

Love to all,

Florence
