School of Nursing

PRE-PROFESSIONAL & VOCATIONAL
Pre-Medicine and Pre-Dentistry
Business
Aviation
Fisheries
Industrial Arts
Home Economics
Dean P. W. Wright and who, themselves, have a personal education. As state requirements were increased Seattle ings so as to keep pace with rising standards. Hundreds of practice school. When the large graded schools in King school was discontinued. At the present time students in the School of Education devote an entire quarter to "di- rected teaching." Each code does this teaching in a single school under a regular teacher as the "critic." The overall supervision is done by Miss Vivian Larson, who goes from school to school coordinating the work, advising with the principal and the critic teachers and holding conferences with the student teachers. Throughout the years the School of Education has taken a very active interest in placing its graduates. This service, toward higher salaries for teachers constitutes a real tide has turned and a fine group of students are now =an- tards are very generous in their financial gain or popular success.

The School of Music is responsible for touch of campus musical entertainment in the form of concerts, recitals, and special music in churches, schools, clubs, and over the radio. Those include appearances of various members of the music faculty and advance students. Special mention should be made of the A Cappella choir, the college Orchestra society, the Victory Male Chorus, and the Orchestra. The School of Music is a definite part of the college program. Opportunity is given for students to choose, as a collegiate major, either applied music or music theory and literature. Those choosing applied music may then complete the degree of Bachelor of Music, Music or Organ. Throughout the years, the college has preferred to give the A.B. degree for those completing a regular 4-year course with a major in music, rather than a professional degree. The lessons in private instruction are arranged so as to make possible, as a rule, ten 30-minute lessons per quarter.

International School of Missions

Seattle Pacific College is probably receiving wider publicity just now because of its new International School of Missions than for any other reason. Indeed, communications and favorable comments have been received from missionaries in the field of Christian service. The other point of view maintains that the academic studies include the entire School of Religion. Such a course makes it possible for students, after graduation, to enter the active missionary field in those countries or organizations where they are able to combine the benefits of the Seattle Pacific College and the World Missionary Board. The college is able to give full recognition to the work done in the various branches of the academic program. For the Seattle Pacific College faculty members are active in the various branches of the World missions.

Dean E. W. Hibel
Pre-Medicine and Pre-Dental

For many years Seattle Pacific College has enjoyed an enviable reputation in regard to its offerings for those pursuing a pre-medical or a pre-dental course. As a matter of fact, the pre-medical course at Seattle Pacific College rates higher than do the pre-medical schools in some of the large universities. This is due to the strong emphasis given here to general studies in Biology, including Physiology and Comparative Anatomy, and the insistence upon a broad academic background. Because of this, students taking their pre-professional work at Seattle Pacific frequently have the advantage over others in the keen competition which they meet in the medical schools.

Within recent years students from Seattle Pacific have entered the following Medical Schools: McGill University, Washington University at St. Louis, St. Louis Medical School, Northwestern University, Kansas University, Indiana University, Stanford University, Philadelphia Women's Medical School, Oregon State University, Pennsylvania University, and Tulane University. The record made by students at Stanford and at Northwestern is phenomenal.

The pre-medical and pre-dental courses at Seattle Pacific are 4-year courses leading to the Bachelor of Science degree. Students looking toward medical training should keep informed regarding the requirements of the medical school which they desire to attend. Practically all medical schools now require prospective students to take the Professional Aptitude Test which is approved by the Association of American Medical Colleges. Seattle Pacific gives this test each year to those seeking admission to a medical school.

Business

While pursuing a regular college course, many students wish to include in their program such courses and such training as will make it possible to go directly into the business field. Such desire can be accomplished at Seattle Pacific in two ways. In the first place, a student may choose Economics and Business as a major, receiving the B.A. degree at the conclusion of the 4-year course. In the second place, students whose major field of study may be other than business can, at the same time, carry studies in this field as electives which will give the desired training. Courses are available in typing, shorthand, accounting, business law, office management, business correspondence, mathematics of finance, economics and other subjects.

Industrial Arts

Although shop experience is not considered a basic element in a college of arts and sciences, Seattle Pacific believes every college student, and particularly ministers, missionaries, and school teachers, as well as engineers, should have opportunity for at least some training in general construction and the use of tools. Such opportunity has been made possible by the recent establishment on the campus of an Industrial Arts department under the direction of Professor Willard Trepus. Much shop equipment has been obtained from War Surplus. Some of this is already in use. Before most of it can be mounted for use, however, it will be necessary to get an adequate shop building. It is hoped, when this is provided, to offer basic instruction in auto-mechanics and radio.

Flight Training

The first definite instruction in Aviation by Seattle Pacific College is scheduled to begin at the opening of the Spring Quarter, March 24. The College is setting up its own school rather than contracting with an established flying school. Flight instruction, itself, will be given at the Snohomish Air Field where facilities, including planes, ready-room, lockers, and an independent office are being leased. The Snohomish Air Field is about 21 miles from the Seattle City limits.

Six-Quarter Elective Credit Course. In the extended course, regular college students may elect Aviation and cover the entire course required for a Private Pilot's Certificate in 6 quarters (2 academic years). Such students will begin with the first course in ground instruction, carrying 2 credits and the first course in flying instruction carrying 1 credit. At the conclusion of the course, the student takes the C.A.A. Examination. By thus spreading the entire flying instruction over 6 quarters, veterans keep the entire cost within the maximum of $500 per school year, which is allowed by the G.I. Bill of Rights for regularly enrolled college students.

One-Quarter Intensive Course. For such students as may wish to go into flying more rapidly than looking toward a college degree, provision is made whereby the entire course required for such training can be taken in a single quarter. This means, since the course would cost approximately $500, that any veteran selecting the intensive course would use up an entire year of G.I. benefits in one quarter. In spite of this, it is expected that many students will avail themselves of this opportunity.

Fisheries

Because Seattle Pacific has access to both salt and fresh water, and because fisheries is one of the leading industries in Seattle, and also the fact that two of our instructors are experts in this field, Seattle Pacific has a constant call for offerings which will train men for this growing industry. Several young men who received their training at Seattle Pacific are now holding responsible positions in various world wide fishing and packing organizations. It was in connection with this work that Seattle Pacific conducted successful tests in fish packing for No-Bac Ice. The college recently received a 36 foot boat from the government to assist in its fisheries activity. It is expected soon to have a fully equipped fisheries experimental laboratory.

Home Economics

One of the most important, and perhaps one of the least advertised departments of the college, is that of Home Economics. Increasing emphasis, however, is being given to this work. No greater service could be made than along the line of helping young women prepare more definitely for home making and for institutional service. Courses are available in foods, food selection, and food preparation, in clothing and clothing construction, in nutrition, diet therapy, interior decoration, and institutional management. Students may elect Home Economics as a major looking toward the Bachelor of Science degree. Present equipment, in addition to individual laboratory desks, includes 6 new electric ranges, 2 new electric refrigerators, 1 new Bendix washing machine, and 6 Singer sewing machines.
Seattle Pacific College, being a Christian institution, receives no tax support of any kind. In view of this, it must depend wholly upon student fees and gifts from its friends for its financial resources.

The anticipated budget for 1947 is approximately $400,000. It is expected that 25% of this will be received through gifts and 75% from student fees.

Gifts, bequests, and annuities are greatly desired. Those interested are requested to get in touch with the school.

Student tuition and fees.

Much Student Aid Available. Dormitory students have the privilege of working to cover part of the charge for board and room. For work thus done, students receive 65c per hour. Efficient students are able to earn as much as $300 and more during the school year and at the same time carry a full academic load.

Extra charges are made for books and supplies and for flight instruction and private instruction in music, speech, and art.
