VITAL POWER OF HOPE

Jürgen Moltmann, Ph.D.

Since the publication of Theology of Hope in 1964, Moltmann has established himself as one of the world’s leading protestant theologians. His personal journey of hope began with a Christian conversion experience while he was a German prisoner of war during World War II. His subsequent lifelong work in theology has led to numerous books, articles, and awards.

The central themes of his work include a theology of hope, a theology of the cross, and a theology of the trinity. In 1967, Moltmann was appointed as professor of systematic theology at the University of Tübingen in Germany. He is now emeritus professor of theology at Tübingen.

Closing Announcements

Susan VanZanten Gallagher, Director of the Center for Scholarship and Faculty Development

Because of the day’s events, all seminars, classes, and labs held before 3 p.m. have been canceled. All classes and labs after 3 p.m. will be held as usual.

As a further way of promoting and celebrating learning, ASSP Student Life, and the Office of Academic Affairs are co-sponsoring a raffle that will pay for one student’s Winter Quarter textbooks, up to a $300 maximum. The raffle is open to graduate and undergraduate students who are not full-time SPU employees. Any student in attendance at an afternoon workshop can pick up and turn in (on site at each workshop) a raffle ticket.

Afternoon Seminars
1-1:50 p.m. and 2-2:50 p.m.

HOPE: OPEN/CLOSED
Roger Feldman, Professor of Art
Judith Kresser, Assistant Professor of Art
Laura Lasworth, Professor of Art
Christen Mattix, Assistant Professor of Art
Karen Gutowsky, Associate Professor of Art

SPU Art Center Gallery, 3 West Cremona

In honor of Jürgen Moltmann's pioneering work, the SPU Art Center Gallery has mounted an art exhibition by SPU faculty on the theme of hope. In this session, faculty artists will discuss the importance of hope in art and will comment on some of the works included in the exhibit. "Hope: Open/Closed" will be open to the public through October 26, 2007. Gallery hours are 8 a.m.-5 p.m., Monday-Friday.

HOPE IN THE UNSEEN: BOOK REVIEW AND DISCUSSION
Christie Eppler, Associate Professor of School Counseling
Peterson Hall 303

Hope in the Unseen: An American Odyssey From the Inner City to the Ivy League, by Ron Suskind, recounts the true story of Cedric Jennings, a talented black teenager struggling to succeed in one of the worst public high schools in Washington, D.C. The narrative follows Jennings as he graduates from high school and goes to the brave new world of Brown University. After an overview and summary of the book, Dr. Christie Eppler will lead a discussion on how we can provide hope to students who are transitioning into the SPU community from various backgrounds.

THE PSYCHOLOGY OF HOPE

Kynette Bikos, Associate Professor of Clinical Psychology and Director of Research
Lauren Shepherd, Doctoral Student
Demaray Hall 258

Recent work in positive psychology has identified that people who thrive in life often possess the personality-related variable of hope. The most commonly accepted definition and analysis of the hope construct was established by C.R. Snyder from the University of Kansas. Through both theory and the evidence of significant empirical study, Snyder defines hope as motivation (willpower) and agency (waypower). This workshop will distinguish hope from other positive psychology constructs, take the HOPE scale and interpret the results, summarize the benefits of having hope, and look at ways to strengthen hope in our own lives.

DARKNESS ON THE EDGE OF TOWN: THE GOSPEL OF HOPE ACCORDING TO BRUCE SPRINGSTEEN
Joel Kesten, Associate Professor of Christian Ministry
Library Seminar Room

Singer-songwriter Bruce Springsteen is one of the few voices in American popular music that offers diversity to both his audience and the genre in a truly American way. This seminar will look at how Springsteen’s Catholic heritage re-imagines the virtue of hope throughout his musical career — from his New Jersey working-class tales of lost hope to his topical commentaries on hope amidst violence from Vietnam and 9/11.
ALL IS NOT YET WELL: HOW OUR VISION OF THE FUTURE INSPIRES ACTION HERE AND NOW

Bob Zurinsky, Assistant Director of the Center for Worship
Demaray Hall 254

Professing and affirming hope for the future does not mean we can sit back in complacency in the present. This session explores some of the ways in which hope and action are integrally related, and how a Christian vision of the end of the story affects the way we live out our own stories today.

EDUCATION AND HOPE: DIVERSITY AND THE FUTURE OF THE PUBLIC SCHOOL CLASSROOM

Matthew Okun, Interim Supervisor for the School of Education
Peterson Hall 201

Educators seem to be eternal optimists. We teach so that we can “touch the future.” We believe in the goodness of our students, and we work to enhance those qualities. We look at all of the current problems in the world and dream about a world without war and hunger. And we have faith in the fact that as individuals we can make a difference. In this roundtable discussion, we will examine how to have a positive effect on our students. If we focus on acceptance of diversity and in teaching tolerance in our classrooms, can we make a “small step” toward a more peaceful world? How might we make a “giant leap” toward the dream that Martin Luther King Jr. introduced into our reality almost four decades ago?

REMEMBERING THE FUTURE: THE LEGACY OF MOLTMANN’S THEOLOGY OF HOPE

Doug Koskela, Assistant Professor of Theology
Peterson Hall 302

After Jürgen Moltmann’s Theology of Hope appeared in English in 1967, a headline on the cover of The New York Times read “Our God Is Dead” Doctrine Lying Ground to Theology of Hope.” That headline only begins to capture the monumental impact of Moltmann’s groundbreaking work. For much of the 20th century, the doctrine of Christian eschatology received little sustained attention in academic theology. Moltmann set out to recover this fundamental dimension of Christian doctrine in a relevant way — and with astonishing success. His book explores the entire Christian faith from the perspective of a hope that is grounded in the resurrection of Jesus and open to the in-breaking Kingdom of God. In this presentation, Dr. Doug Koskela discusses the theological context of Theology of Hope, its key ideas, and its continuing significance 40 years later.

HIP, HOPE, OR HOPE? UNDERSTANDING UNDERLYING TENDENCIES IN THE CULTURE WE ENGAGE

William Woodward, Professor of History
Science Building 112

One subtle but distinguishing attitude underlying 21st-century American culture is a simmering anger. From road rage to gangsta rap, from political talk-show venom to hate speech, our media and our social interchange seethe with resentments and thwarted dreams — driven by a celebrity culture bent on selling instant solutions. This session suggests concrete explanations in recent history for Americans’ growing frustration (and self-doubt, its corollary). We then will look to C.S. Lewis’ The Great Divorce (and music based on it) for clues to how Christians can, as people of the Light and the Real, speak hope to hostility. Participants will be asked to share from their own thinking and experience about how to engage this cultural tendency.

EFFECTIVE SCIENCE TEACHING AS A VEHICLE OF HOPE: TOWARD THE ELIMINATION OF COLOR AND SOCIOECONOMIC BARRIERS IN SCIENCE LEARNING

Stamatis Vokos, Professor of Physics
Kathryn Show, Science Curriculum Consultant for Seattle Public Schools
Otto Miller Hall 138

Swift scientific and technological advances require 21st-century citizens to have robust content knowledge, flexible problem-solving skills, effective communication skills, and sophisticated habits of mind. Yet national statistics show that ethnically diverse students and students of low socioeconomic status are less likely to develop basic science literacy skills by the time they graduate from high school, if they graduate at all. There is a ray of hope: School districts with strong leadership in science, effective curriculum, appropriate support for teachers, and longstanding community partnerships can become national models of effectiveness in science achievement for all students. This interactive presentation will examine national data and use Seattle as an example of a complex urban school system that is working hard to eliminate the achievement gap in science.

SUFFERING AND HOPE: INCREDIBLE STORIES LEARNED FROM PATIENTS

Sara Champ-Gibson, Instructor of Nursing
Vicky Asberg, Instructor of Nursing
Kesli Monroe, Instructor of Nursing
Demaray Hall 261

Three nursing faculty members share real-life stories about encountering hope through being present with people in times of suffering. The perspectives shared will come from a variety of health care arenas.

WHAT DOES THE BIBLE SAY ABOUT HOPE?

Dan Peter, Associate Professor of Engineering
Weter Hall 202

In this “back-to-basics” forum, we will review the Bible passages on hope, starting with the familiar and moving toward the not-so-familiar. We will look at what the text says and as a group seek to distill the essential message(s) through individual paraphrase and group synthesis. The goal is for participants to reflect personally on the text and then share their insights.

EXPERIMENTAL THEOLOGY: THE KEY TO SCIENCE AND WISDOM?

Grace Baker, Executive in Residence for the School of Business and Economics
Ken Himma, Associate Professor of Philosophy
McKenna Hall 117

What do science and faith have to say to each other? In his book Science and Wisdom, Jürgen Moltmann says, “It is essential ... to develop a theologia experimentalis, an experimental theology which, together with the modern world, faces up to the experimentum ventitatis, the experiment of truth.” Here is a grand challenge for our university: How do we excel in the teaching and practice of experimental theology? What does this mean for our faith? And how do we live into the hope that our faith will seek wisdom in dialogue with every branch of science? This discussion will explore the interplay of science and faith, plus seek practical advice for a university that desires to excel in both.
The Asian knew it. Growing up with wizards.

Whether they're written for children (Harry Potter) or grownups (The Golden Compass) — give us what Tolkien called “a piercing glimpse of joy” that “renders the very web of story.” But wait a minute ... Arent fairy tales just for kids? Should we be embarrassed for having copies of Winnie the Pooh, The Hobbit, Watership Down, or The Princes Bride on our bookshelves? Should we be reading about witches and monsters, or venturing into “Pan’s Labyrinth”? Jeffrey Overstreet, author of Through a Screen Darkly and the new fantasy novel, Auralia’s Colors, talks about the rewards — and dangers — of growing up with wizards.

Eliminating Extreme Poverty in Our Lifetime:
Impossible Dream or Attainable Goal?

Lisa Donegan, Instrcutor of International Business
Panel of local anti-poverty workers

McKenna Hall 118

According to Jeffrey Sachs in The End of Poverty: Economic Possibilities for Our Time, extreme poverty can be eliminated worldwide by 2025. Is he a delusional ivory-tower theorist or a pragmatic policy visionary? What is extreme poverty, and what are its sources and solutions? Where do we stand in reaching the United Nations’ Millennium Development Goals? What are local groups doing in fighting global poverty? What can you do? Join Dr. Lisa Donegan and a panel of locally based workers in discussing their efforts to alleviate global poverty and disease.

Hope in the Health Care Professions

Cindy Fitch, Associate Professor of Biology; Session Moderator
Alisa Brossot, Tamila Garbus, Lindsay Holladay, Karen Callahan, Kelly Rafailov, Katie King, Jake Sharp, Jessica Carlson, Stephanie Irwin, Jena Goodman, Jordan Zingerman, Student Panelists for Session One
Steve Krager, Luke Davies, Houston Lui, Karen Callahan, Ali Dugger, Jennifer Lawrence, Hanna Oltean, Megan Wrightman, Ashley Whalen, Anna Scheglov, Student Panelists for Session Two
Demaray Hall 150

SPU students aspiring to enter the health care field will hold a panel discussion about the hope they have for providing a healing touch in a health care vocation. The panelists will describe their sense of hope for the future in medicine and other health care fields. They will share how they believe they can combine their faith, their talents, and their aspirations to make the world a healthier and better place. Time will be available for a general discussion on global health care concerns and ideas that SPU students have about continuing to stay involved in such initiatives.

Is There Any Hope in Politics?

Reed Davis, Professor of Political Science

Otto Miller Hall 119

Many Christians are uncomfortable with the thought of pursuing social change in the political arena because the pursuit and exercise of power so often seem to be at odds with New Testament teachings on love and radical discipleship. By reviewing some of the crucial New Testament passages on leadership and politics and hearing some personal “success stories” about what has (and has not) been accomplished through collective political action, participants will be confronted with the “good news” about justice and political stewardship.

Hope Extended: SPU’s 46th Theatre Season

George A. Scranton, Professor of Theatre
Andrew Ryder, Associate Professor of Theatre
Elizabeth Kent, Student Panelist

Otto Miller Hall 109

This panel will discuss some of the implications of comic theory and a theology of hope, and then explore those implications as they relate to the three mainstage comedies of the SPU Theatre Department’s 46th season of shows: The Loman Family Picnic by Donald Margulies; Honk!, a musical comedy by George Stiles and Anthony Drewe; and the classic American comedy You Can’t Take It With You by Moss Hart and George S. Kaufman.

Spiders of Hope Through Reconciliation Ministry

Tali Hainston, director of The John Perkins Center

Otto Miller Hall 245

It seems that most of the time all we hear about is one calamity and tragedy after another. With violence and justice issues filling our TV screens, many of us never get to hear the amazing stories of hope emerging from the people of SPU. Come hear stories from students, staff, and faculty of how hope is growing through reconciliation ministry.
